Summary of Key Points:

At Eagle Ranch Academy we use a Value Based Program to develop the character qualities of our Students, while using our trade marked Life Skills Coaching Program, strong Academics, emphasis on Fitness and Healthy Living, and strong Behavioral Therapeutic Treatment - Our Students learn to tap into their full potential academically, socially, emotionally, and physically.

Our Program is considered an upper level program in terms of the services and benefits we provide the Student and the family. We provide great help for the Student in the way of counseling, therapy, education, medical attention, and basic necessities. Our Students live on a modern residential campus that provides a comfortable place for Students to receive behavioral treatment through our value based program while getting a quality education. Adjacent to our campus is a 1st class fitness center where our Students receive fitness instruction and workouts; and on alternating days they either visit our on-campus rec center or additional fitness workouts on our play field or basketball court. Our Program is unique in all that we offer our Students, and our goal is to truly help Parents help their Child get well from the behaviors that are leading them into a life full of poor decisions and possibly life threatening situations. ERA is one of the most complete and comprehensive Youth Development Programs anywhere.

Our Campus was built by a major Utah corporation, the Woodbury Corporation, specifically for the State of Utah as a Residential Drug and Alcohol Treatment Center. When the Woodbury's heard of our Youth Development Program/School, they offered their facility for our use. The facility has been JCAHO approved in the past, and with our complete remodel of the property, it is truly one of the nicest Youth Program/School facilities anywhere.

Students are placed in 3 family units of 12 to 16 Students with an “embedded” therapist and 3 to 4 professional staff providing constant supervision, instruction, and individual counseling. Therapists are with their family units 40 hours per week providing individual, group, and Student / Parent family therapy. Plus, therapy occurs at critical moments throughout the day, along with the regular 1 hour a week sessions. In fact, often times Students receive therapy or 1 on 1 counseling without even knowing it.

Our full time / on campus staff working directly with Students consists of a Clinical Director, 3 Therapists, 2 Educational Specialists (licensed teachers), Nurse, Cook, Case Manager/After Care Specialist, Family Relations/Seminar Director, and 10 to 12 Professional Staff (on campus at all times); and our on call staff includes a Clinical Psychologist, Educational Psychologist, Behavioral Psychologist, Psychiatrist, Medical Doctor, and weekend Therapist. Our Educational Specialists direct the 4 to 5 hour/day individualized academic program with the help of other team members and the 3D Learn on-line staff.

Three very important components (unique to ERA) include our Emotional Growth Seminars, Graduation Workshops, and After Care Program provide long term growth for Students, Parents, and family members.

Holding true to our Long Term Benefit to the Student, upon graduation from ERA, a College Scholarship is awarded to Students that have contributed in our regularly scheduled Service Projects and/or they provide mentoring through our Alumni Program.
